

A B S T R A C T

A VEHICLE BACK SHELF

5 A vehicle back shelf (1) comprises a central plate
 (6) and two side plates (7) each of which is movable
 relative to the central plate (6). The back shelf
 includes means (8) adapted to control and guide the
 sliding of each of the side plates (7) relative to the
10 central plate (6) in the transverse direction (19) of the
 vehicle in both directions between a deployed position
 and a retracted position in which each side plate (7) is
 substantially retracted under the central plate (6).
